Under Analysis

Data transformation enhancements speeds processes

- **APIs:** Leverage native Databricks APIs for accessing data in Ignite
 - **Data Marts processing:** Improve processing and deployment capabilities for more flexible data mart creation
 - **Data Marts functionality:** Refine v2 Datacore and Data Mart functionality based on user feedback
 - **Event coordinator:** Enhance trigger functionality, enabling primary personas more flexibility when triggering loads
 - **Datamart trigger:** Add flat-files, time-outs, and more advanced logic
- **Productized Source Data Marts:** Add silver layer tables that take a single source of data and transform it into a more consistent and analytical format
 - **Data egress:** Enable secure export of data from Ignite to external storage locations such as S3, ADLS, and more
 - **Incremental deletes:** Allow deletes to incrementally flow from source through data marts

Data Operating System (DOS)

Roadmap and Key Milestones

Updated 07-01-2025

Now

Q4 2025

- **Ongoing improvement and maintenance:**
Behind-the-scenes bug fixes, maintenance updates, and optimizations

Healthcare.AI: Analytics Integration

Updated 07-01-2025

Roadmap and Key Milestones

Now

Q4 2025

- **Standard tools for target setting support:** Set clear, data-driven improvement goals, with the ability to adjust based on your organization
- Healthcare.AI for International customers
- Biweekly visualization and analytic enhancements based on client feedback

Next

Q1 2026

Later

Under analysis

- Utilize Healthcare.AI analytic output as input into large language models for **more direct and actionable insights**

BluePrint Protect *by Health Catalyst*

Roadmap and Key Milestones

Updated 08-07-2025

Now Q4 2025

- **HIPAA One & Protect Integration:** Integrate HIPAAOne SRA and NIST risk data into Protect IRM
- **TPRM/IRM Workflow Integration:** Automate TPRM assessment findings & risks into IRM
- **MCP infrastructure:** Establish Model Context Protocol for secure, interactive, multi-agent risk management

Next Q1 2026

Later Under analysis

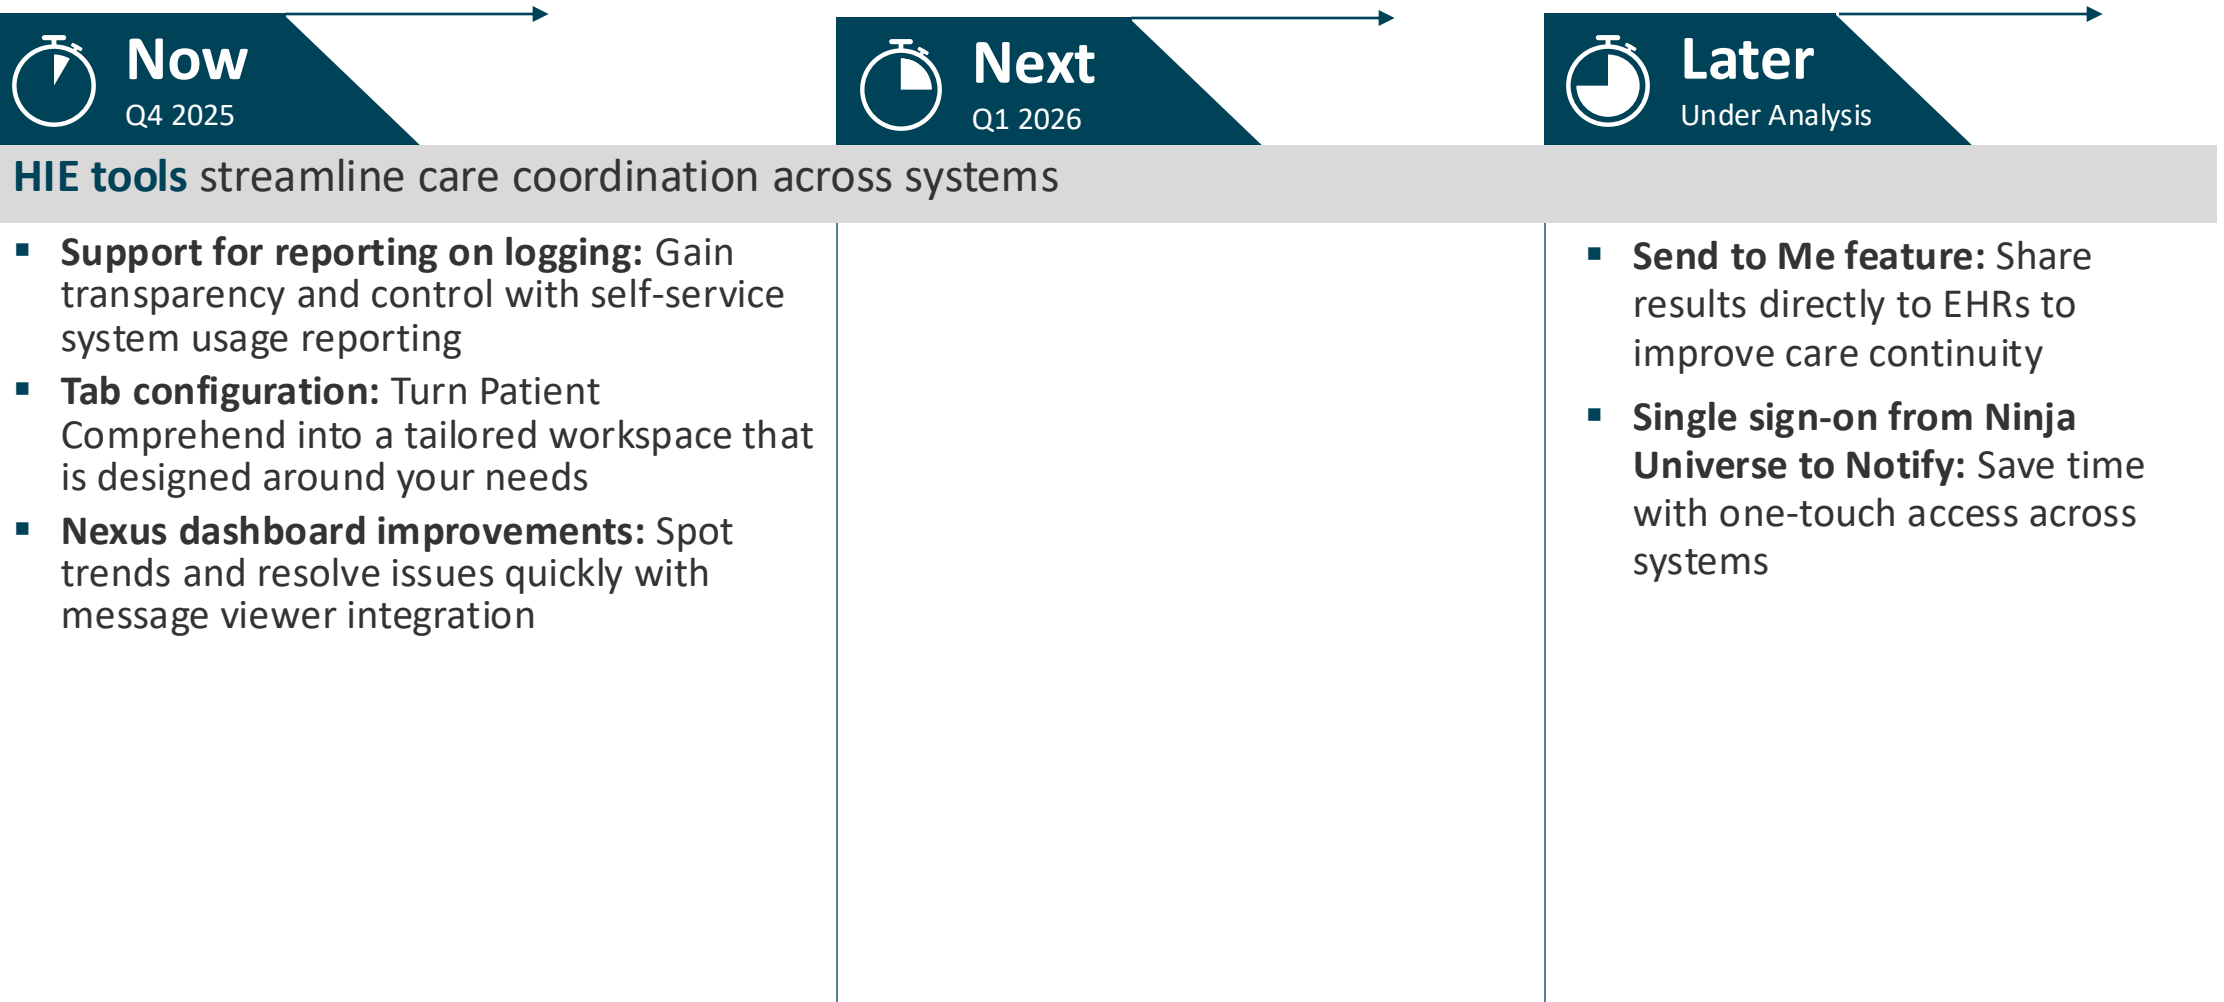

- **Risk Management Agents:** AI agents for automating various risk management processes
- **Risk Analytics:** Protect IRM data with Ignite for actionable insights
- **Dashboards:** Improvement metrics and prioritized risk actions
- **Assessment engine:** Multi-framework risk assessments
- **Controls library:** Centralize client controls and evidence gathering
- **Continuous Monitoring:** NIST SCAP v2 Support

Interoperability

Updated 07-01-2025

KPI Ninja Universe

Roadmap and Key Milestones

Updated 07-01-2025

 Now Q4 2025	 Next Q1 2026	 Later Under Analysis
Interoperability enhancements unlock seamless data and flow insight		
▪ Additional gender values: Enhance patient inclusivity with expanded gender options ▪ Geographic data access controls: Protect data with location-based safeguards to support TEFCA standards		▪ Patient demographic queries: Accelerate patient identification with PDQ and PIX queries ▪ FHIR ingest: Aid interoperability with native FHIR support ▪ Queue support for Notify: Improve migrations to Nexus v4
Smarter notifications improve responsiveness and reduce care gaps		
▪ Notification status: Track communication success with email and text delivery status ▪ Password reset policy: Increase security and flexibility with configurable password reset and policy options		▪ Portal-only notification: Enhance privacy with minimal notification options in portal ▪ Patient registry matching: Allow patients to match using PID:3 identifiers

Under Analysis

Unified platform accelerates trusted, scalable analytics

- **Reduce AWS costing:** Optimize platform costs with intelligent resource scaling
- **Direct flat file ingestion:** Speed up onboarding and integration with streamlined file processing
- **Automated transformer migrations:** Ensure seamless upgrades with automated transformer migration
- **Patient location tagging:** Enhance public health reporting with precise geographic patient insights
- **More PDMP Options:** Stay ahead in opioid safety with next-generation prescription monitoring
- **NEMESIS data repository:** Integrate EMS data for comprehensive patient care timelines
- **Ingest newer HL7 versions:** Improve interoperability by supporting the latest standards
- **USCDI v3 and v4:** Stay compliant with evolving federal health data requirements
- **SDoH repository:** Uncover population health trends with social determinants of health data
- **Claims data repository:** Gain a full picture of patient care by combining clinical and claims data

Measures and Registries

MeasureAble

Roadmap and Key Milestones

Updated 07-01-2025

Now

Q1 2026

- **Multi-level group measure calculations:** Support performance insights by calculating quality measures at different levels
- **Continuous Enrollment UI:** Allow users to see measure performance based on HEDIS continuous enrollment specification
- **Backfill Optimization:** Streamline results backfills into the EDW

Next

Q2 2026

- **Write into Metric Store:** Measure results written to the general Metric Store in Ignite to facilitate usage of result data across all solutions within Health Catalyst.
- **Trending:** Support additional analytics natively within MeasureAble.

ARMUS

Roadmap and Key Milestones

Updated 09-19-2025

Now Q1 2026

- **New registries:** Launch NY State SHIRS Registry
- **Registry version change:** Launch STS Thoracic v5.26, NY State 2026 CSRS/PCIRS, STS/ACC TVT, SCOAP v6 updates
- **Efficiencies:** Streamline audits with TVT and LAAO IRR Expansion
- **Enhanced self-service analytics:** Introduce Cross-tab feature to LAAO and Thoracic registries; Enhance IRR Reporting with Detail and Summarization features
- **Chart abstraction AI:** Launch NLP-powered abstraction for CathPCI

Next Q2 2026

- **Registry version change:** ACC IMPACT, ACC CPMI V3.2
- **Efficiencies:** Streamline audits with EPDI IRR Expansion
- **Enhanced self-service analytics:** Launch GWTG-CAD StarMetrix Dashboard and Cardiogenic Shock Metric Library; Introduce Executive Summary Reports for ACC CPMI, CathPCI and STS Adult Cardiac registries

Later Under analysis

- **Registry version change:** Implement ACC CathPCI v5.1 upgrades, STS/ACC TVT Upgrade
- **Efficiencies:** Streamline audits with AFIB IRR Expansion
- **Enhanced self-service analytics:** Enable ad hoc filtering in Standard Reporting
- **Chart abstraction AI:** Launch NLP-powered abstraction for CPMI, TVT and LAAO registries

Now

Q1 2026

- **Registry reporting compliance:**
Add v26 NAACCR/NCDB required changes
- **Navigation Improvements:**
Streamline user interface

Next

Q2 2026

- **Registry reporting compliance:**
Add v26 NAACCR required changes (state exports)
- **Accreditation compliance summaries:** Expand the suite to include NAPBC and NAPRC
- **Expand import options:** Improve data ingestion

Later

Under analysis

- **Analytics dashboards:** Incorporate new analytic tools and provide additional KPIs
- **Enterprise controls:** Enhance abilities to customize settings as a facility group
- **Accreditation compliance summaries:** Expand the suite to include NAPBC and NAPRC
- **Integrate AI capabilities:**
Increase efficiencies for faster and more accurate data collection

Value Optimizer

Roadmap and Key Milestones

Updated 07-01-2025

Now

Q4 2025

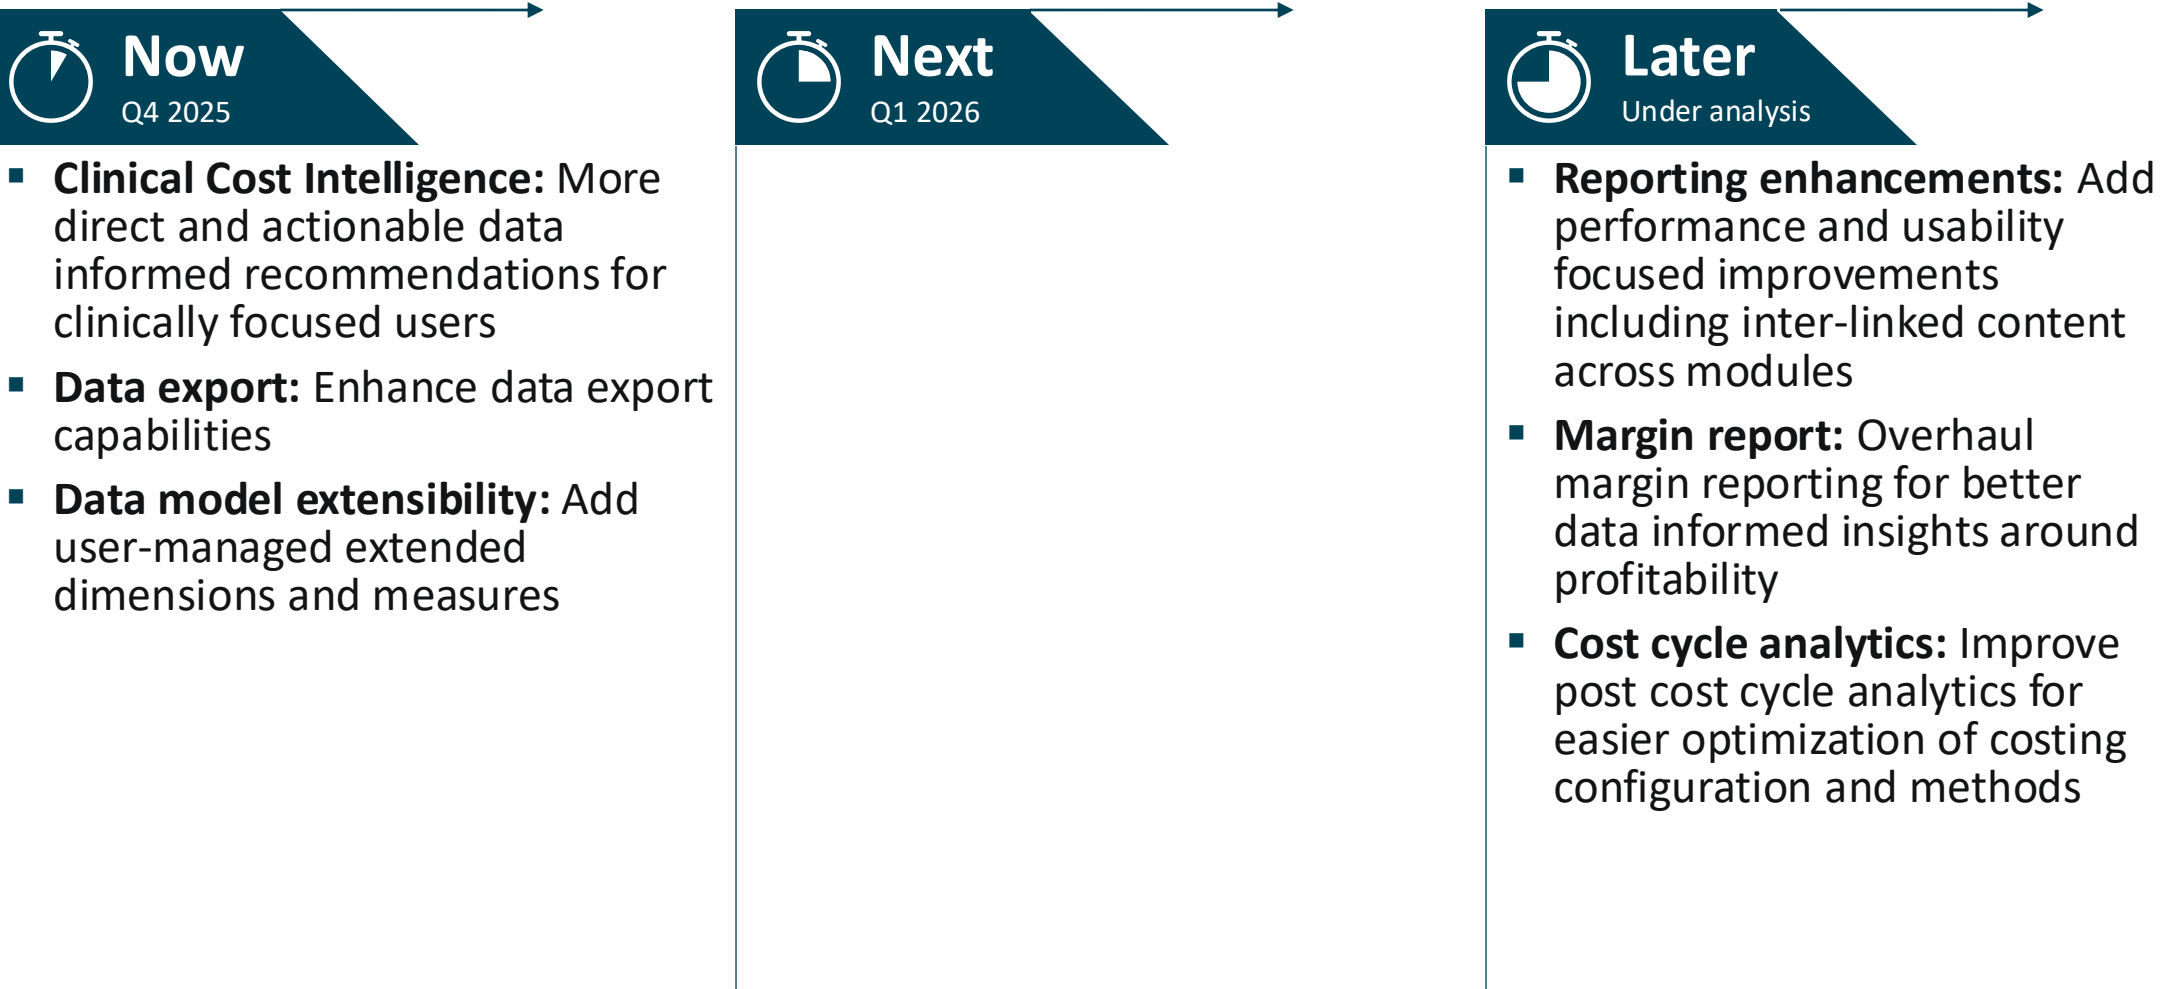

- **Ongoing optimization:** Continuous enhancements, performance tuning, and support to maximize long-term value.

Revenue and Cost Improvement

PowerCosting

Roadmap and Key Milestones

Updated 07-01-2025

PowerLabor

Roadmap and Key Milestones

Updated 07-01-2025

Now Q4 2025

- **Reporting interface:** Update All Reports interface for consistent UI across products
- **Data quality:** Add standard data quality checks
- **Shift level analytics:** Add finer granularity of analytics where shift level data are available

Next Q1 2026

Later Under analysis

- **Productivity dashboard:** Integrate refinements and Improvements to BETA preview design evolution
- **Additional reports design updates:** Reduce scrolling and improve UX layout and performance (phase 2)
- **Global variance:** Improve control over variance analytics
- **Data export:** Add direct data export without requiring a report to be built

VitalCDM

Roadmap and Key Milestones

Updated 10-20-2025

Now

Q4 2025

- **Change History Dashboard:** Improve visibility at a glance by providing analytics around change volume and contents. Statistics compiled and calculated nightly.

Later

Under analysis

- **Import Improvements Part 2/3:** Includes import of Secondary CDM files through new broker and validation. Includes honing speed and efficiency of import process, etc.
- **Combined Analysis results by line item:** Combined results per line item and use AI to deliver results in order of perceived potential value and natural language

VitalKnowledge

Roadmap and Key Milestones

Updated 10-28-2025

Now Q4 2025

- **IPPS Pricer:** Include IPPS Pricer within Code Validate
- **CPT changes (Insiders View):** Available for purchase

Next Q1 2026

- **Global search:** Include MyAdvisor and VitalAlerts in Global Search capabilities

Later Under analysis

- **Device/Supplies Dataset:** Update Device/Supplies Dataset with improved data within product
- **Refine Device/Supplies Search and Print abilities:** Remove exact option with manufacturers and allow for limited printing of Device/Supplies items
- **Medicaid Fee Schedule:** Add state Medicaid Fee Schedules to Code Detail Panel

Hospital Price Index

Roadmap and Key Milestones

Updated 09-23-2025

Now

Q4 2025

- **Claims processing redesign:** Revamp claims to ensure faster processing times, support unzipping nested folders, and improve efficiency and data accessibility
- **2026 final rule updates:** Respond to the 2026 final rule for items outside of claims data processing

Next

Q1 2026

- **2026 final rule updates, continued:** Continue responding to the 2026 final rule for items outside of claims data processing
- **Rebuild public URL site:** Implement a new design optimized for enhanced search engine visibility and significantly improved MRF download performance

Later

Under analysis

- **Rebuild public URL site:** Continue improvements to design, SEO, and MRF download performance

Clinical Improvement

CareFlow

Roadmap and Key Milestones

Updated 12-11-2025

Now

Q4 2025

- **Ignite migration (Core Platform, IHCI):** Continue with the migration to Ignite platform.
- **Ability to track edits or changes on the interventions:** Intervention updates now show who made the change, when, and what was changed in the "Show More" section.
- **Retain the intervention List in home page when assigning and re-assigning an intervention:** Enable the Home page to retain user selections so care team members can return without losing their in-progress work.
- **Add created by and created date in the PGBA open items:** Display "Created By" and "Created Date/Time" across Problems, Goals, Barriers, Activities, and Closed PGBA items so care team members can easily see who created each entry and when.

Next

Q1 2026

- **Ignite migration (Core Platform, IHCI):** Continue with the migration to Ignite platform.
- **Ability to add a new care team member to an intervention in the assign box:** Allow adding and assigning care team members directly from the intervention dropdown with role and privacy rules.
- **Add and track edits for PGBA (Problems, Goals, barriers and activities):** PGBA updates now show who made the change, when, and what was changed in the "Show More" section.

Later

Under analysis

- **IHCI Medications:** Medications from Epic into CF, Medications in Care Plans
- **EPIC Double Documentation:** To integrate Careflow with Epic to eliminate double documentation
- **PGI Tagging and program prioritization:** Add Care Program tags to PGI Items and Care Notes with program-based filtering.
- **Templates in Care Notes:** Add configurable Care Note templates for standardized, efficient documentation.
- **Bulk Discharge:** Allow bulk phase-based patient discharge with predefined reasons

Now Q4 2025

- **Expansion of EDCs and platform capture capabilities:** Broaden electronic data capture and platform tools
- **Data host migration:** Move to modern secure hosting
- **Terminology management sophistication:** Enhance standardized coding and harmonization
- **Assisted ePRO reporting:** Add guided workflows and automated suggestions
- **Measure expansion:** Broaden quality measures library

Next Q1 2026

Later Under analysis

- **Multi-language support expansion:** Add languages beyond Spanish
- **IVRS for ePROs:** Enable voice response data collection

Embedded Refills

Roadmap and Key Milestones

Updated 09-17-2025

Now

Q3 2025

- **Enhancing clinical workflow efficiency with HL7 CDS API launch:** Enable integration for workflow-triggered CDS calls, ensuring real-time clinical decisions (Epic)
- **Next-generation Embedded Refills:** Modernize infrastructure and ensure ongoing regulatory compliance (Athena)
- **Enable or disable pinned refill messages** (Athena)
- **Ruby upgrade:** Improve stability and security

Next

Q4 2025

- **Next-generation Embedded Refills: (FHIR migration)** Modernize infrastructure and ensure ongoing regulatory compliance (Athena)
- **Short-term prescriptions warning** (Athena, Cerner, Veradigm)
- **Refill checks in months instead of days** (Epic)
- **Refill recommendation text now in black color when request is not In protocol** (Cerner)

Later

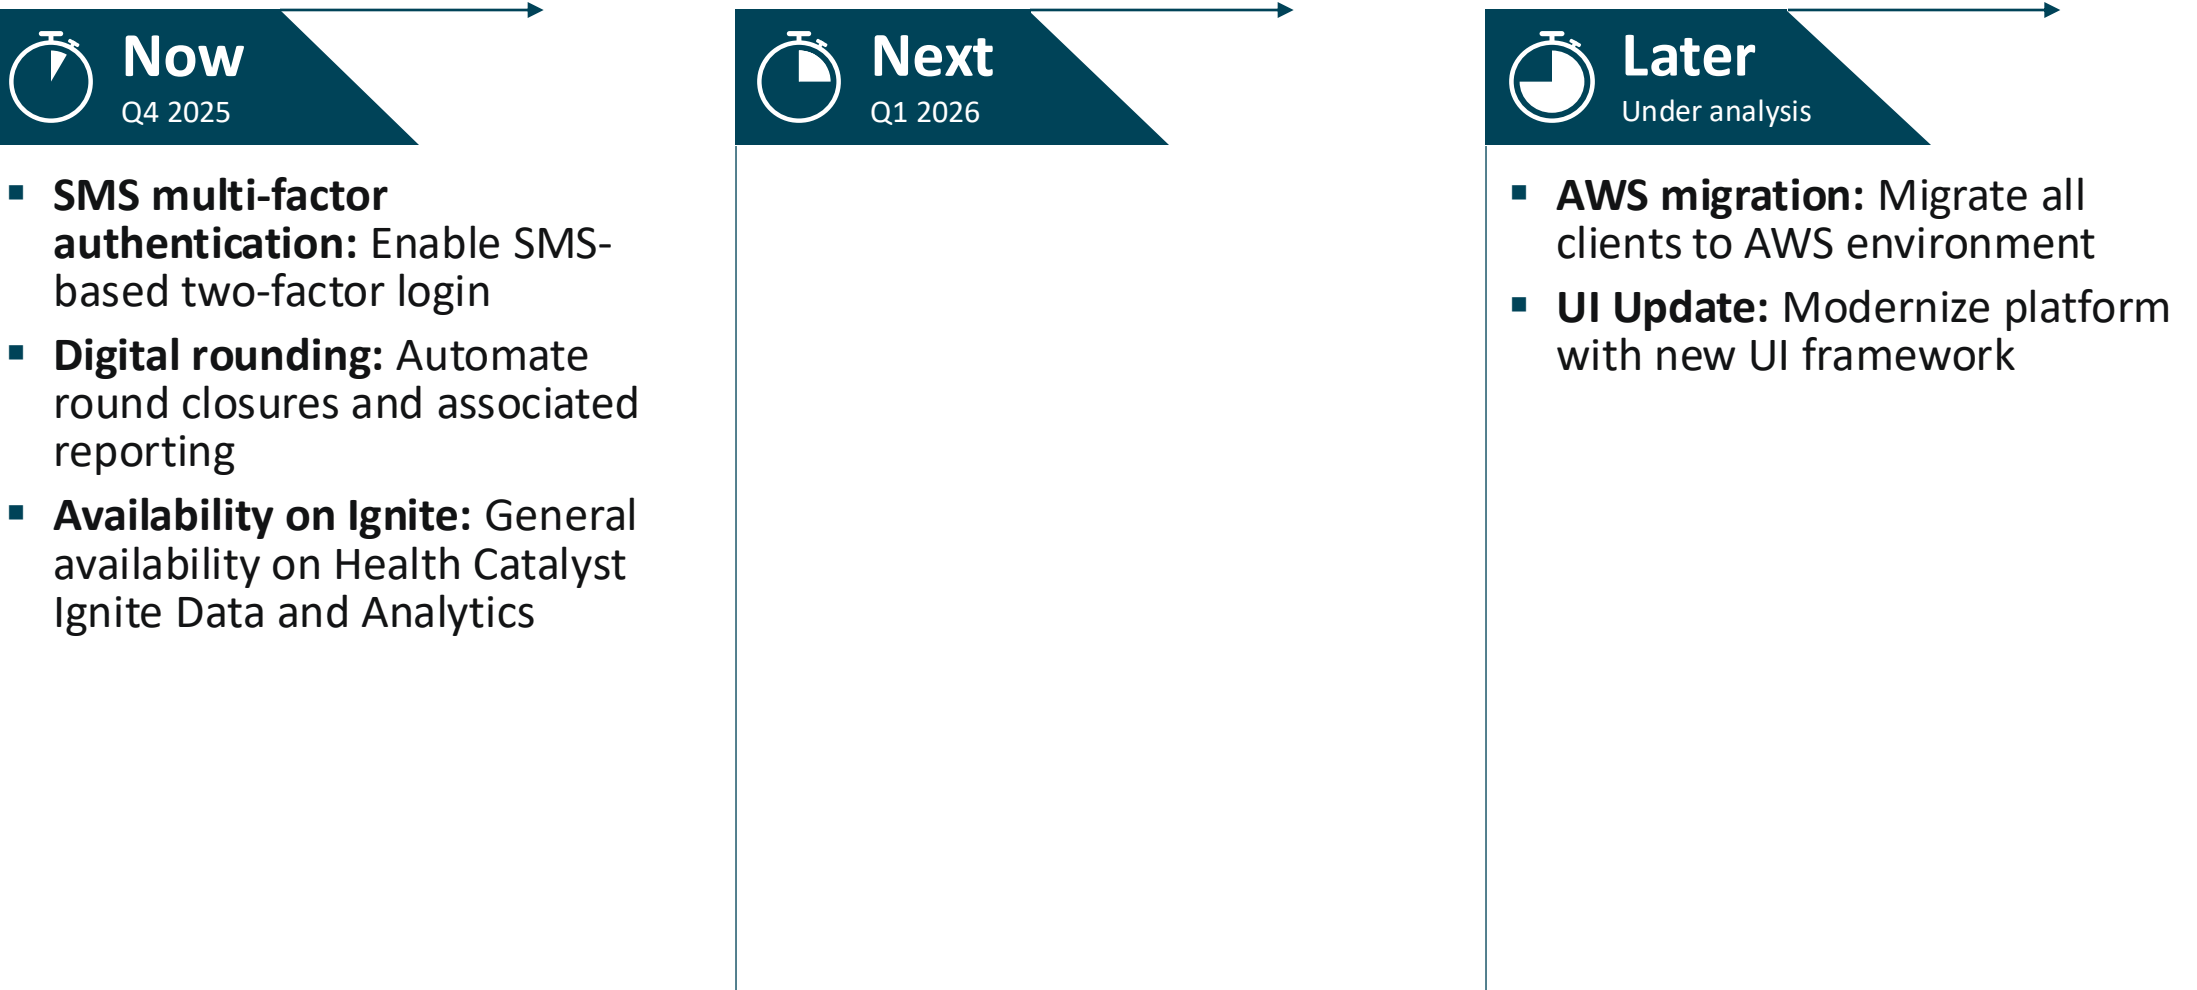

Under analysis

- **Embedded analytics features:** Prioritize and define future analytics features
- **Additional functionality:** Update bucket hierarchy and naming for manual review messages, automatically pull lowest systolic blood pressure when multiple readings are taken during a visit, Meditech integration, and more!

Lumeon Care Orchestration

Roadmap and Key Milestones

Updated 07-01-2025

Pop Analyzer + Johns Hopkins ACG®

Updated 09-17-2025

Roadmap and Key Milestones

Now Q4 2025

- **ACG for Integris:** Adoption
- **ACG for Bryan Health:** Adoption
- **Geo-health module:** Release - Incorporate SDoH risks related to geography to give users a unique view of health needs and disparities in their population.
- **V14 upgrade:** Release - New enhancements: non-negative concurrent risk, new drug classes, new social need markers, new observation export.
- **ACG Ignite migration:** ACG platform Core migration

Next Q1 2026

- **Geo-health module:** Adoption - Incorporate SDoH risks related to geography to give users a unique view of health needs and disparities in their population.
- **ACG IHCI Ignite migration:** ACG IHCI platform migration
- **ACG integration with VBC Product**

Later Under analysis

- **ACG for Revere:** Providing metrics for PMPM Risk Adjusted, PMPM to Benchmark, PKPY to Benchmark

Patient Safety Monitor

Roadmap and Key Milestones

Updated 09-17-2025

Now Q3 2025

- **Mitigating the Tech Debts:** Moving notification from notifier service to real time,
- **Improve experience:** Behind-the-scenes bug fixes, updates and optimizations - (Database indexes)

Next Q4 2025

- **Technology Upgrade – Angular:** Modernizes the application framework to improve long-term performance, stability, and user experience.
- **Improve experience:** Behind-the-scenes bug fixes, updates and optimizations.

Later Under analysis

- **Inactive User Auditing:** Strengthens security by ensuring only active and authorized users have access.
- **Improved Data Export Performance:** Delivers faster and smoother data exports to save time and support efficient reporting.

Twistle Patient Engagement

Roadmap and Key Milestones

Updated 11-01-2025

Now Q4 2025

- **Personalized patient experience:** Utilize Health Catalyst's Upfront software to allow a more personalized set of patient messages
- **Expand patient visibility across practices:** Allow users to view patients from multiple practices where appropriate

Next Q1 2026

- **Patient tracking improvements:** More robust tracking of patient interactions to support timely follow-ups and personalized engagement
- **Processing larger message volumes:** Upgrade backend to reliably process higher message volumes during peak demand

Later Under analysis

- **Generative AI for building pathways:** Use AI to auto-generate and suggest patient communication pathways

Upfront *by Health Catalyst*

Roadmap and Key Milestones

Updated 07-01-2025

Now

Q4 2025

- **Microsite & patient experience:**
 - SDOH integrations (FHIR/ HL7)
 - SDOH collection and use (block vis)
 - Classifier in microsite
- **Client portal:** Segmentation / Gen-AI Content Assistant
- **Market insights:** APIs/SDK

Next

Q1 2026

Later

Under analysis

- **Analytics:** Power BI analytics dashboard rollout
- **Microsite and patient experience:**
 - Turnkey Integrations
 - Segmented IVR
- **Client portal:** Market insights integration
