

Review the latest VitalCDM features and enhancements. For more help and step-by-step instructions, go to the [VitalCDM Docs](#).

New Features and Enhancements

The Filters pane now features the Revenue & Usage button and Associated Cost Center button. This allows you to view associated cost centers separately from cost centers tied to usage data and more easily manage your cost centers.

CDM admins can now view if a cost center has associated or usage items in the Has Associated Items and Has Usage Items columns on the Departments table in Manage Departments. This helps determine if a cost center is being managed as an associated cost center or if it is a free for all cost center, where usage is attributed.
